Website Pages

A comprehensive digital platform for a leading EV charging network, designed to provide seamless navigation for electric vehicle owners. The site features an interactive station locator and a robust resource hub to drive app downloads and user engagement.

What we built:

- Home (Landing Page)
- Interactive Map Interface
- Services & Solutions
- Partnership Program
- App Integration Guide
- FAQ & Support
- Contact & Locations
- Dynamic Blog/News Section

Timeline

From initial concept to a live, high-performance site, this project was executed over a three-week sprint. We focused on high-speed map rendering and a mobile-first UI to cater to users on the go.

What we built:

- Brand Identity Alignment
- Interactive Map Integration
- Mobile-First UI Design
- Custom Asset Illustration
- Responsive Frontend Development
- Partner Logo Animation
- Final Performance Optimization

Stack & Tools

2+ Software Designed in Figma and delivering a fast, SEO-ready legal website with dynamic routing for 30+ individual practice area pages.

What we used:

- Figma (Design & Prototyping)
- React.js / Next.js
- Tailwind CSS
- Mapbox API (Station Locator)
- Framer Motion (Animations)
- Vercel (Hosting)

Project Overview Radnav Solutions is a Chicago-based healthcare staffing company connecting hospitals and clinics with experienced radiology technologists. Digitally Hatch was brought in to design and develop a professional web presence that communicates trust, clarity, and credibility to two distinct audiences: healthcare facilities and radiology technologists.

The Challenge Radnav needed a website that could speak to two very different users simultaneously: clinic administrators looking for reliable staffing, and technologists looking for work opportunities. The challenge was building a clear, conversion-focused experience without making either audience feel like an afterthought.

Website Pages

A multi-page website covering the full Radnav brand story, from landing to conversion, tailored for both healthcare facilities and technologists.

What we built:

- Home
- About Us
- Services
- For Technologists
- For Clinics
- Contact Us

Timeline

From initial discovery through to final deployment, structured across two focused weeks of design, development, and refinement.

What we built:

- Discovery & Briefing
- Wireframing
- UI Design
- Development
- Content Integration
- QA & Launch

Key Design Decisions

Dual Audience Navigation: Separate dedicated pages for Clinics and Technologists, so each user lands in the right place immediately

Trust-First Visual Language: Clean, professional aesthetic with medical imagery that builds credibility for a healthcare brand

Video Hero: Homepage features a full-bleed background video to immediately communicate the brand's energy and professionalism

Clear CTAs: Every page drives toward a single action: Schedule a Conversation or Get In Touch

Mobile Responsive: Fully optimised across all screen sizes given the on-the-go nature of the technologist audience

Custom UI Components

100%

Responsive Layout

Website Pages

A sleek, professional fintech landing page and service architecture for an Australian-based financial firm. The site is designed to simplify complex financial structures into a clean, conversion-oriented user experience.

What we built:

- Interactive Home Page
- Comprehensive About Us
- Service Overview
- Dedicated Finance Vertical Pages
- Integrated Contact & Inquiry Systems
- Client Confidence & FAQ Sections

Timeline

A streamlined execution from initial concept to high-fidelity deployment, focusing on a premium aesthetic and a "considered, professional approach" to the user journey.

What we did:

- Brand Strategy & Visual Direction
- Sitemap & UX Flow Modelling
- Low-Fidelity Wireframes
- High-Fidelity UI Design
- Responsive Frontend Development
- Mobile Optimisation & QA
- Deployment

Stack & Tools

Designed with a focus on modern minimalism and data visualisation. We utilised a high-performance stack to ensure fast load times for financial charts and a seamless interface across all devices.

What we used:

- Figma: For the custom UI/UX design and prototyping.

GLOBAL RECON
BY JEFFREY BROWN

ANALYSIS EPISODES ABOUT CONTACT SUBSCRIBE

Iran: Window Closing

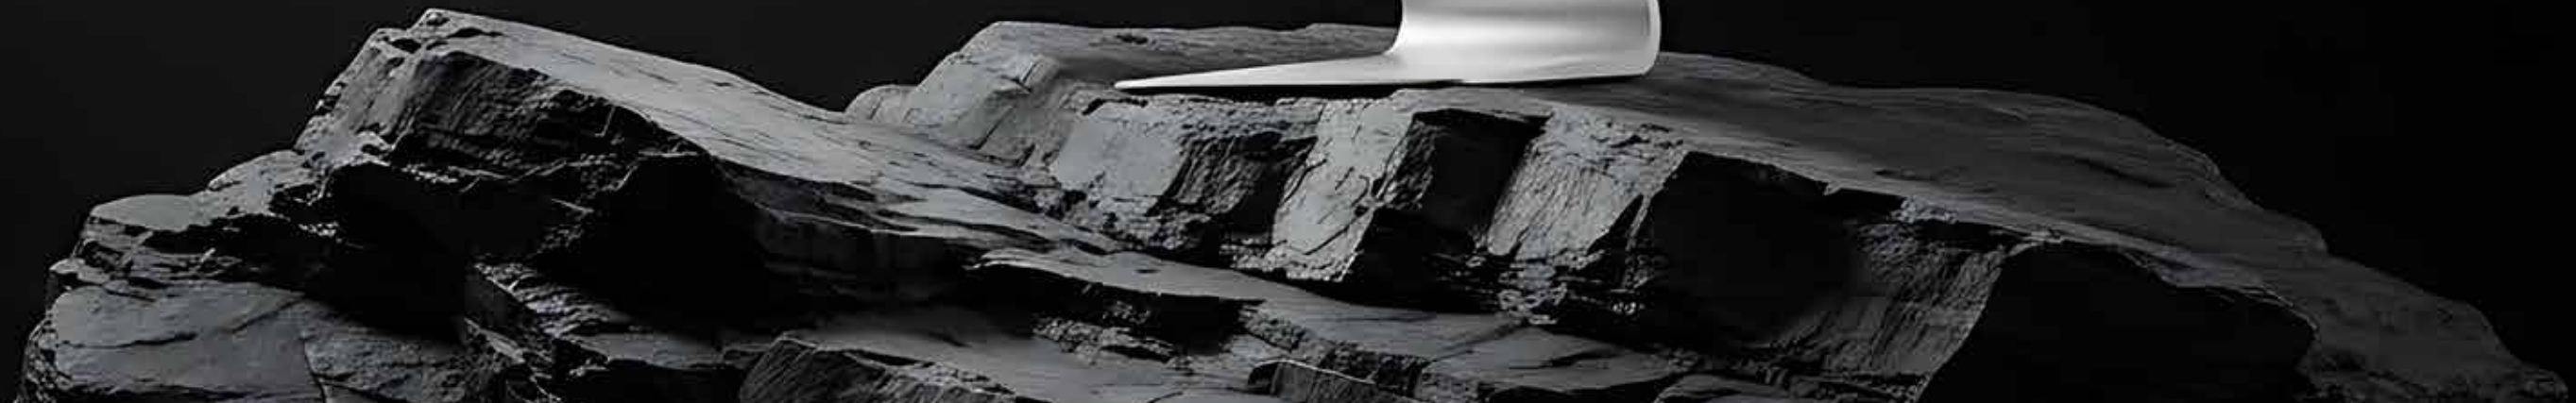

A strike on Iran is likely imminent. The convergence of military positioning, tactical timing, and this administration's established behavioral pattern points toward action within a narrow and closing window.

Website Pages

A high-impact intelligence and media platform designed for Global Recon, featuring deep-dive geopolitical analysis, a multi-series podcast archive, and a secure newsletter ecosystem.

What we built:

- Home (High-Conversion Landing Page)
- Analysis Hub (Geopolitical Reports)
- Podcast Archive (Detailed Show Notes)
- Latest Episodes
- Featured Intel
- Weekly Brief Subscription
- About the Analyst
- Contact & Secure Tips
- 10+ Individual Deep-Dive Article Pages

Timeline

An accelerated three-week sprint focused on establishing a "dark-mode" premium aesthetic while organising a vast library of audio and written content.

What we did:

- Discovery & Content Audit
- Information Architecture
- UI/UX Design
- Development
- SEO & Metadata
- QA & Launch

Stack & Tools

Built for speed and security, utilising a modern stack to ensure that media-heavy pages load instantly across all devices.

What we used:

- Figma: For the custom UI/UX design and prototyping.

Website Pages

A premium, high-conversion e-commerce storefront for a natural hair care brand. The site features a minimalist, "soft-glam" aesthetic designed to showcase luxury hair accessories and organic products through a seamless shopping experience.

What we built:

- Home: High-impact hero section with curated collections.
- Shop All: Dynamic product grid with category filtering.
- Product Detailed Page: Optimised for conversions with "Why you'll love it" accordions and "You May Also Like" upselling.
- About Moogra: Brand storytelling focused on values and clean ingredients.
- Cart & Checkout: Frictionless user flow for a 2-step purchase process.
- Blog: Educational content hub for hair care tips and SEO growth.

Timeline

A rapid, focused sprint from brand discovery to a fully functional Shopify/e-commerce deployment, ensuring the visual identity remained consistent across all touch-points.

What we did:

- Discovery & Brand Alignment
- E-commerce Sitemap & User Flow
- UI/UX Design (Mobile-First)
- Inventory & Product Integration
- Payment Gateway & Shipping Setup
- QA Testing & Mobile Optimisation

Stack & Tools

Built with a focus on high-speed performance and aesthetic precision to ensure the "luxury" feel translates into a fast, responsive user experience.

What we used:

- Figma (Custom UI/UX Design)
- Shopify / Liquid (E-commerce Engine)
- Klaviyo (Email Marketing Integration)
- Adobe Creative Suite (Asset Optimisation)

Website Pages

A high-performance digital marketing agency website designed to showcase premium PPC, SEO, and lead generation services. The site features deep-funnel architecture, client-proof case studies, and conversion-focused landing pages built to turn traffic into high-value agency leads.

What we built:

- Home (Performance Focused)
- About Us (Founder-Led Story)
- Service Categories (Google Ads, Local Services, YouTube)
- Microsoft Advertising Landing Page
- Case Studies Archive
- Individual Success Stories (SaaS, B2B)
- Web Analytics & Reporting Overview
- Contact & Lead Capture
- Privacy Policy & Terms

Timeline

A month-long sprint focused on brand positioning and technical SEO infrastructure to ensure the site ranks for competitive marketing keywords from day one.

What we did:

- Discovery: Competitor gap analysis & USP definition
- Architecture: Content clustering for PPC and SEO services
- UX/UI Design: Dark-mode "Modern Chic" aesthetic implementation
- Copywriting: Conversion-led headlines and service descriptions
- Development: Custom responsive build with fast-load optimisation
- Integration: CRM lead-form and Google Analytics 4 setup

Stack & Tools

Built with a modern tech stack to ensure lightning-fast load speeds (Core Web Vitals) and a seamless editing experience for the Grow Marketing team.

What we used:

- Figma: Custom UI/UX prototyping
- WordPress/Elementor: For scalable content management
- Google Search Console: For indexing and sitemap submission
- WP Engine: High-speed, secure hosting
- Yoast SEO: Advanced metadata and keyword optimisation
